

Living 2023

# Maia, by Patricia Urquiola

Like an architecture that is in keeping with its surroundings, the Mala collection designed has a natural lightness and elegance.

The design of the artisan braiding, the sturdiness of the aluminum frame and the new, Porotex and chenille fabric collection create a combination that oozes energy.

# Maia

## by Patricia Urquiola

Using an architecture that keeps its surroundings in mind, Patricia Urquiola's Kettal collection has a natural lightness and elegance to it. The design of the artisan braiding, the sturdiness of the aluminum frame, and the new fabrics create a combination that oozes energy. The collection was hailed as one of the most representative designed of our century.

# Finishes

The importance of research, both scientific and technological, has always been at the forefront of product development. The highly innovative nature of the brand means that today one can enjoy a high-quality product.

Kettal, loyal to its philosophy of respect for the environment, uses eco-friendly paint. Almost all of Kettal's furniture paints are now 100% ecological and recyclable, and the wood used is protected under Perhutani certification.

## Materials

### Aluminium electro-paint

Aluminium is one of the most corrosion-resistant metals in existence. Kettal selects and continuously controls its raw material aluminium in regard to chemical composition, hardness and elasticity through stress, bending and temperature tests. Once selected, the aluminium is painted with polyester powder (used in the automobile industry) applied electrostatically. This finishing process lends superior surface quality and weather resistance.

### Ceppo di gre

Ceppo di gre is a typical Italian stone which its origin comes from the mountains of Lombard, it is recognized by its elegance and exclusivity featured by its large pebbles. We provided in a gres finish, since we get the beauty of the material combined with the properties of gres, including skid resistance and high performance. The Ceppo di gre is an ideal option for exterior usage.

### Minera stone

Architectural concrete made out of concrete resin. This material provides an aesthetic finish, which allows us to find the exact smoothness and color we require for our collection. Most importantly not losing the properties of concrete, which gives the architectural feeling to the product. Water repellent

### Concrete

Architectural concrete made out of concrete resin. This material provides an aesthetic finish, which allows us to find the exact smoothness and color we require for our collection. Most importantly not losing the properties of concrete, which gives the architectural feeling to the product.

### Stone

Unlike surface-dyed fabrics, the fabric colour is impregnated into the fibre during manufacture, providing exceptional resistance to wear and tear caused by chlorinated and salt water, sunlight and moonlight.

### Glaze

It is a painting finish developed and used exclusively by KETTAL. The concept is to apply a finishing which visually looks as ceramics, but with a strong technical development that allows to apply it on aluminium top tables. This allows us to have the warm feeling of ceramics with the durability and quality of aluminium coatings.

**Marble (Untreated)**

Kettal Marble is light and strong, thanks to its technical structure, a combination of marble, aluminium honeycomb and fiberglass. It is a natural matte carbonate stone from the metamorphosed limestone family that is outstanding for its compact texture and fine crystalline structure. Travertine marble is a hard natural stone, very sturdy in terms of outdoor use, with uneven colouration and a polished finish.

**Red Balau**

Red Balau is a tropical wood from the Dipterocarpaceae family. It is a compact high-density wood with a high tropical resin and oil content. Balau is used in nautical construction due to its robustness and resistance, and it is prized for its hardness and excellent water-resistant properties. The mechanical properties of Red balau are optimum; however, this wood is little-known among the general public. One of its characteristics is that it is heavier and harder than teak.

**Teak (Untreated)**

The teak used in Kettal products is obtained by selecting the best trunks from sustainably managed plantations controlled by Perhutani. Only the most appropriate trees are selected, one by one. The area used is the central part of the trunk, as it is the straightest and free of branches. From this painstaking selection process we obtain our teak, one of the finest in the world. The wood is planed to give it a more natural feel, and a sealant is applied. All Kettal teak products are provided with a waterproof sealant, which should be applied every three months.

**Warning**

Being a natural material, teak may change colour or even crack due to humidity levels and sudden changes in temperature. Left outdoors, teak undergoes a natural process of oxidation that affects its colour, which turns an attractive silvergrey shade. Teak furniture is treated with a waterproof sealant to protect it from damp and stains (as long as they are cleaned immediately); however, this sealant naturally wears off over time. We recommend treating the wood with sealant every three months, more frequently in the case of hotel and catering establishments. To restore the original appearance of teak, sand all over and apply teak sealant.

### Oak

Oak selection as a material for Kettal is due to the optimal characteristics of this type of wood. It's one of the strongest and long lasting woods in the market. The oak wood is very attractive since it has beautiful light grain natural color and the smoothest feeling when touched. In fact it is a highly resistant material due to its anti fungi properties. Our oak is provided from a sustainable source, using naturally fallen trunks. Even though oak wood is very durable, the tree lifespan is short, making this process complete sustainable.

### Rattan

It is a natural fiber which comes from palm lianas. It is an extraordinary material, characterized by its flexibility. Its warmth and natural nature gives the furniture a special feeling. It's a material which is recommended to be used in an INDOOR ambiance, if not it can get damaged since natural rattan fiber needs a dry area to maintain its properties.

### Rattan Synthetic

Our rattan synthetic fiber is very exclusive due to its similarity to the natural fiber, not only visually but also by its smoothness in touch and texture. It has been designed to have a high durability in outdoor conditions. Its strength and durability can withstand extreme conditions.

### Anti-UV Synthetic Fibre

The material used is high-density polyethylene with UV inhibitors and is one of the most suitable materials for outdoor use. To guarantee perfect quality, Kettal uses a mass-dyed fibre (for colourfastness) of a density higher than market standard.

**Terrain Elements Fire Retardant**

Unlike surface-dyed fabrics, the fabric colour is impregnated into the fibre during manufacture, providing exceptional resistance to wear and tear caused by chlorinated and salt water, sunlight and moonlight. These fabrics receive water-resistant treatment.

**Tonale Lino / Boucle Fire Retardant**

Unlike surface-dyed fabrics, the fabric colour is impregnated into the fibre during manufacture, providing exceptional resistance to wear and tear caused by chlorinated and salt water, sunlight and moonlight. These fabrics receive water-resistant treatment.

**Bela rope Fire Retardant**

Cord made of polyester or polypropylene thread and handcrafted, weather-resistant material.

**Parallel fabric**

A fabric with high-strength polyester yarn, covered with PVC, with wefts that may vary in accordance with each need. Porotex from Kettal can be used for seats and backrests stretched over aluminium structures and for cushions. Foam-filled Textilene cushions are completely suited to the outdoors thanks to their permeable capacity: the open plaiting of Textilene and “open” structure of its wadding mean drainage of water from the cushion occurs naturally.

**Shelter Fabric**

Special fabric designed to last for years. It's a membrane with a satin finish ideal for outdoor conditions due to its high UV resistance, easy cleanability and stability.

**Leather**

Genuine cowhide used in high-wear areas. It has a stain-resistant finish and is easy to clean. One of its key features is its resistance to stains. Thanks to this and many other features, Kettal Leather requires no specific or costly maintenance.

**Cleaning and maintenance.**

For everyday maintenance, clean with a soft cloth and warm water. To extend the life of Kettal Leather, we recommend using a neutral non-oily leather care product every six months. In case of stains, rub gently in circles with a damp cloth from the centre of the stain outwards. Dry the treated area with a cloth. Leather is a natural material, which means there may be slight variations in colour.

**Soga**

Cord made of polyester or polypropylene thread and handcrafted, weather-resistant material.
